DETAILED ACTION

1. The applicants canceled claims 1-6 in the response to advisory action on 11/30/04.

The pending claims are 7-27.

Allowable Subject Matter

- 2. Claims 7-27 are allowed.
- 3. The following is a reason for indicating allowable subject matter: Claim 7 identifies the distinct feature, providing permanent anchor sections representing physical selections of a roadway, an anchor section defining a spatial reference in road data, the anchor sections also integrated with linear data to form a road network; associating attributes and linear events with positions in the road network; storing linear event data related to anchor sections in a relational table; storing road attribute data by associating each attribute with locations specified in terms of a linear referencing method (LRM); implementing a dynamic segmentation function for conducting dynamic segmentation on a selective basis, maintaining historical data related to anchor sections and linear event data; enabling the creation of an interior intersection within the road data, where an interior intersection to an anchor section is defined by offsets from an end of the anchor section; synchronizing spatial and linear data, for tying spatial data to a physical location represented by the road network; and utilizing meta-data definitions for database elements in a data dictionary, the data dictionary defining an implementation of the relational database, resulting in an extensible relational database

model. The closest prior art, Hamsa (U.S. Patent No. 6,564,201) disclosing a map

database, fails to suggest the claimed limitation as mentioned above in combination

with other claimed elements. The above features in conjunction with all other limitations

of the dependent and independent claims 7-27 are hereby allowed.
